**SUPA MARE**

**SUPA FEEDS SUPA MARE** is a premium textured feed that is designed for optimum health and quality performance And YES, this is another one of the SUPA FEEDS products that has been manufactured in house by North Country Grains Ltd. With North Country Grains Ltd shaping and leading the markets in which it chooses to compete, this is another product that has been manufactured to the highest standard of horse feed, consistently providing real life results. Experienced the difference?

**Ingredients selected from:** Oats, Barley, Maize, DDG, Vegetable Oil, Molasses, Bran, Chaff, Copra, Soya Bean, Calcium, Salt, Vitamins & Minerals.

**CAUTION:** Contains Selenium 0.3mg/kg feed. Do not exceed the stated dose and frequency. Do not use at the same time as any other selenised fertiliser, prill or product without consulting a veterinarian.

**Feeding Recommendations:** SUPA MARE is a supplementary feed for broodmares. This meal should be fed along with adlib pasture and good hay. The actual level fed is dependent on the condition of the mare, stage of pregnancy or lactation and the quality of the pasture.

As a guideline, feed 2-4kg/day of SUPA MARE to a mature mare of around 500kg starting with 1-2kg in early pregnancy, rising to 3kg in late pregnancy and 4kg at peak lactation. If the mares' body condition is poor at the start of pregnancy this should be raised to 2-3kg/day until condition is regained. If the mare is over fat reduce the meal intake to 0.5 to 1kg/day during early pregnancy. When offering higher amounts split the daily meal into morning and evening feeds to avoid acidosis and improve the efficiency of meal utilization. Mixing the meal with chaff will reduce the rate of meal intake to help minimize digestive upsets. SUPA MARE contains a full range of major minerals, trace minerals and vitamins no other dietary supplementation is required.

Offer fresh feed daily and discard uneaten feed as this may be a source of mould growth which will reduce palatability and promote mycotoxin contamination of fresh feed and feeding containers. Ensure fresh clean drinking water is available at all times.

**TYPICAL ANALYSIS:**

Nutrients	Dry Matter
Horse DE	3.594 mcal/kg
Horse DE	15.027 MJ/kg
Fat/Oil	3.227 %
C Fiber	4.854%
C Protein	11.491%
Lysine	0.327 %
Meth+CYS	0.330%
ASH	5.188%
Magnesium	0.224 %
Calcium	0.935 %
TOT Phos	0.496 %
Salt	0.825 %
Sodium	0.178 %
Chloride	0.510 %
